# HOW TO MAKE YOUR OWN MASK

1- Take a cardboard plate ;

2- Cut a cardboard plate in two. Note that you can use each half to make a mask.

3- Make the holes for the eyes using a template.

4- Next, draw and cut out the different shapes (ears, nose…) of your animal in reference to the models (from white paper or Canson paper if you would like them to be more sturdy).

5- To finish, use gouache or acrylic paint to paint the mask. Choose your colour of plate :
  ✓ The bear is brown
  ✓ The frog is green
  ✓ The fox is orange
  ✓ The snake is brown and green
  ✓ The deer is brown too
  ✓ The rabbit is « up to you » !

6- Our cardboard masks are handheld. Stick a wooden stick or a brochette stick behind the half-plate. Stick it on the right-hand side if you are right-handed, and on the left-hand side if you are left-handed…

7- Use the stapler to fix the ears…

Frog (eyes instead)	bear	rabbit	squirrel
snake	deer	fox	mole

Have fun !
